

## Custom & OEM Product Solutions

Vector Data specializes in the development of custom products at the request of customers, system integrators and equipment manufacturers. We design and produce solutions for various market verticals including:

- Telecommunications
- Military & Defense
- Aviation & Aerospace
- Oil & Gas

Vector Data also offers customized OEM versions of existing manufacturers' products to meet the specialized needs of various customers. Among our most popular customized solutions are:

- DC Power Supplies & NEBS Certification
- Ruggedized & MIL-SPEC
- Environmental & Cooling Enhancements
- Power Consumption & Efficiency
- Form Factor Reduction & Modification
- Branding
- EOL & Legacy Product Reproduction

Vector Data understands the unique needs each customer requires in the data center. The Vector Data family of custom & OEM products includes:

- Data Storage Systems (RAID, SAN, NAS)
- Rackmount & Blade Servers
- Network Devices
- Chassis & Enclosures
- Power Supplies

Vector Data maintains teams of electrical, CAD, mechanical, software & compliance engineers supported by an experienced team of project managers and marketing specialists to bring products to market quickly and affordably.

Vector Data has partnered with many product manufacturers to deliver the custom and OEM product solutions that our customer demand.

Through strong partnerships with major certification laboratories, Vector Data delivers proven test and certification results on predictable timelines.
